

ZMORPH

3D PRINTERS
THAT DELIVER

Multi-Tool FAB & ThermoForming Systems

ZMorph delivers the perfect desktop fabrication solutions for **STEM & CTE** education programs. They're affordable and out-of-the-box ready, just click to work! Get **FREE** curriculum through ZMorph Academy.

Reliable / Click to Work / Turn Your Desk into a Workshop

3D Printing

FFF (Fused Filament Fabrication), Single & Dual Extruder Toolhead with a layer resolution of .05 to .4 mm and automatic leveling. Materials: ABS, PLA and PETG.

Laser Engraving/Cutting

Plug and play functionality, the 6W laser can be swapped in seconds like ZMorph's other tool heads. G-Code is easily generated using the Voxelizer software.

CNC Carving

Zmorph Fab is equipped with a professional CNC worktable with a simple solution for materials mounting. Safely work with various shapes and sizes of different materials. Zmorph's Software now features CAM-standard workflow for CNC procedures with STEP operations, ability to change the tool within one G-code, and path visualisation.

Thermoforming

The Shape is a table-top vacuum thermoforming machine with an ergonomic design that allows you to work safely. The professional construction made of aluminum and steel guarantees a durable system that can work with a wide range of materials.
